👤 PROFILE

I'm a self-taught Software Engineer with several years of hands-on experience designing and building real-world applications — from production-ready PWAs to custom backend systems and automation tools. I specialize in performance-driven development, offline-first architecture, and full-stack delivery using React, Laravel, Node.js and related technologies. While I don't hold a formal CS degree, my knowledge comes from years of structured self-study, building from scratch, and solving actual user problems with clean, maintainable code.

🛠️ WORK EXPERIENCE

2019 – 2024
Abuja, Nigeria

PluxScore

Software Engineer (Solo Project)

- Developed a full-featured PWA offering **real-time sports updates**, social interactions, and media highlights.
- Iterated on the app over multiple versions — from raw PHP to **CodeIgniter**, then **React + Laravel** with **Laravel Echo** for real-time features.
- Built the entire stack solo, optimized for mobile, and deployed under **Plux Media Network**.

2019 – Present
Abuja, Nigeria

Akmustech

Freelance Web Developer

- Troubleshoot and fix technical issues on live websites, including layout bugs, server errors, and broken integrations.
- Handle deployments and setup on platforms like **cPanel**, **AWS**, and **DigitalOcean**.
- Assist with domain configuration, SSL installation, and performance tuning.
- Provide on-site support when needed to ensure smooth operations and client satisfaction.

2024

Akmustech

Instructor

- Taught a foundational programming course for pre-university and CS students, emphasizing language-agnostic concepts by solving problems in JavaScript, Python, and C++.
- Led a "Python for Kids" holiday program, using familiar analogies (like boxes for variables) to make programming fun and accessible for young learners.

2023
Abuja, Nigeria

Twelvesquares Technologies and Services Limited

Web Developer

- Independently designed and built the official corporate website using **React**, **Laravel**, and **TailwindCSS**.
- Responsible for frontend implementation, backend integration, SEO optimization, and deployment.

2023
Abuja, Nigeria

Kazeem Tanimu

Web Developer (Contract via Twelvesquares)

- Designed and implemented a personal brand site from scratch using **React** and **TailwindCSS**.

- Highlighted the client's fashion and political work in a clean and modern layout, fully responsive across devices.

EDUCATION

2014 – Present

Self-Directed Learning

- Studied official documentation and manuals, including:
 - MDN Web Docs [↗](#) (HTML, CSS, JavaScript, Web APIs)
 - React Official Docs [↗](#)
 - Node.js Official Docs [↗](#)
 - PHP Manual [↗](#)
 - Python Docs [↗](#)
 - LearnCpp [↗](#)
 - GoalKicker Books [↗](#)
- Completed structured courses and projects via:
 - freeCodeCamp [↗](#)
 - chrome for developers [↗](#)
 - Electron.js [↗](#)
 - Laravel Docs [↗](#) & CodeIgniter [↗](#)
 - Fastify [↗](#) & Express [↗](#)
 - Stellar Developer Portal [↗](#)
 - W3Schools [↗](#)

Jan 2014 – Sep 2016
Abuja, Nigeria

High-School

Apex Star Academy
WAEC Certification — Graduated

SKILLS

Front-End Development

React.js, TailwindCSS, Vite,
Electron.js, PWA APIs

Backend-Development

Fastify, Express.js, Node.js, Laravel,
CodeIgniter, PHP, SQL Databases
(MariaDB, MySQL, SQLite)

PROJECTS

2024

Purrfect Farmer [↗](#)

(Personal Project) React, TailwindCSS, Vite, Socket.IO, Chrome Extension APIs

- Designed and developed a Chrome extension for automating Telegram Mini App tasks, focused on multi-account farming.
- Built advanced UI using React and TailwindCSS powered by Vite.
- Implemented real-time command mirroring across profiles using Socket.IO [↗](#) for synchronized multi-account actions.
- Created the Purrfect Ecosystem, containing tools like:
 - Purrfect Whiskers [↗](#)
 - Purrfect Fly (Fastify.js) [↗](#)
 - Purrfect Mirror Server [↗](#)
- Used actively by a growing user community [↗](#), backed by 100k+ [↗](#) lines of code and continuous improvements.

PWABucket [↗](#)

React, Vite, TailwindCSS, PWA APIs, GitHub Pages

- Designed and built PWABucket — an open-source Progressive Web App store focused on showcasing high-quality, offline-first tools.
- Developed the platform using React and Vite, with full offline support using modern PWA standards.
- Launched and published multiple apps under the PWABucket GitHub organization, including:
 - **Stellar Cargo** [↗](#) – a Stellar Wallet with token split/merge features.

- **Keza**  – a secure, offline wallet generator for EVM, Solana, and TON blockchains with batch mnemonic export.
- **AiEarn Tracker**  – an investment tracker with date simulation and full calendar navigation.
- Maintained a consistent engineering standard across all apps, focusing on privacy, usability, and offline capabilities.

2022 – present

Portfolio

My portfolio site

Tech Stack: Vite, React, TypeScript, TailwindCSS, React Router

- Designed and developed a fully responsive personal portfolio site to showcase my projects, skillset, and background as a Software Engineer.
- Each project entry features custom-written overviews, tech stacks, and roles — offering direct insight into my individual contributions.
