🪪 PROFILE

Software engineer with experience building and deploying web, progressive web, and desktop applications end-to-end. Skilled in React, Next.js, Laravel, Node.js, and offline-first architectures, with hands-on experience deploying production systems on cPanel, VPS, AWS, GCP, and Cloudflare. Comfortable working independently or within teams, delivering maintainable, production-ready software across client, product, and open-source environments.

🧠 SKILLS

Front-End Development
React, Next.js, Vite, TailwindCSS, Bootstrap, Progressive Web Apps (PWA)

Backend-Development
Laravel, Node.js (Express, Fastify), REST APIs, SQL (PostgreSQL, MariaDB, MySQL, SQLite)

Real-Time & Messaging
WebSockets, Laravel Echo, Socket.IO

Desktop & Automation
Electron, Chrome Extensions, Telegram Bot / Mini Apps

Blockchain & Crypto
EVM, Solana, TON, Stellar SDK, ethers.js, solana-web3.js

Infrastructure & Deployment
cPanel, VPS, AWS, Google Cloud Platform, Cloudflare Workers, GitHub Pages

Tooling
Git, GitHub, Vite, CI workflows

💼 WORK EXPERIENCE

2022 — Present

Client & Contract Work
Software Engineer / Full-Stack Developer
- Developed and delivered production web applications and progressive web apps for clients across multiple industries.
- Built internal tools and integrated third-party gateways and APIs.
- Developed responsive, SEO-friendly corporate and personal brand websites using React, Laravel, TailwindCSS, and Bootstrap.
- Deployed applications on cPanel, VPS and cloud platforms, using Cloudflare Workers for edge-level optimizations where required.
- Collaborated under NDA constraints while delivering maintainable, production-ready solutions.

2019 — 2024
Abuja, Nigeria

PluxScore ⧉
Software Engineer / Full-Stack Developer
- Built a cross-platform progressive web app with real-time data updates, social functionality, and integrated media delivery.
- Ensured a consistent, responsive UI/UX across platforms, with correct navigation behavior (including back gestures) and predictable interactions to avoid cross-platform inconsistencies.
- Implemented real-time functionality using Laravel Echo and WebSockets.
- Deployed the application on a VPS and optimized streaming using Cloudflare Workers for edge delivery.

2019 – Present
Abuja, Nigeria

Akmustech ⬈
Freelance Web Developer
- Troubleshoot and fix technical issues on live websites, including layout bugs, server errors, and broken integrations.
- Handle deployments and setup on platforms like cPanel, AWS, and DigitalOcean.
- Assist with domain configuration, SSL installation, and performance tuning.
- Provide on-site support when needed to ensure smooth operations and client satisfaction.

2024

Akmustech ⬈
Instructor
- Taught a foundational programming course for pre-university and CS students, emphasizing language-agnostic concepts by solving problems in JavaScript, Python, and C++.
- Led a "Python for Kids" holiday program, using familiar analogies (like boxes for variables) to make programming fun and accessible for young learners.

2023
Abuja, Nigeria

Twelvesquares Technologies and Services Limited ⬈
Web Developer
- Designed a corporate website using React, Laravel, and TailwindCSS.
- Deployed the website on cPanel and enhanced SEO with Server-Side rendering.

2023
Abuja, Nigeria

Kazeem Tanimu ⬈
Web Developer (Contract via Twelvesquares)
- Designed and implemented a personal brand site that highlights the client's fashion and political work in a clean and modern layout, fully responsive across devices.

2024

Real Hope Foundation ⬈
Web Developer
- Created a charity website with Laravel, Inertia, and React, prioritizing responsiveness, user engagement, and SEO optimization.
- Assisted with email configuration and optimized outgoing mail delivery for reliable communication.

📁 PROJECTS

2024

Purrfect Farmer ⬈
Chrome extension for automating Telegram mini apps with multi-account support.

2025

Purrfect Whiskers ⬈
Electron app to manage multiple instances of Purrfect Farmer with session isolation.

2025

PWABucket ⬈
Open-source app store showcasing offline-first progressive web apps.

2025

Keza ⬈
Offline progressive web app for generating crypto wallets and secure mnemonics.

2025

Stellar Cargo ⬈
A Stellar blockchain wallet with multi-account management and token operations.

2025

Parcel ⬈
Progressive web app for splitting / merging tokens on different blockchains.

2025

Safe ⬈
Sci-fi themed app for encrypting text, images, and files offline.

2025   **Tracker** ⧉
Simple app to monitor investments, simulate returns, and track progress offline.

Mochi ⧉
Minimal React chat app template, PWA-ready.

🎓 EDUCATION

Jan 2014 – Sep 2016
Abuja, Nigeria

High-School
Apex Star Academy
WAEC Certification — Graduated
